## Step 3 – Add on Solar Lithium Ion P04 Batteries

### Advantages

- ✓ Last 5 times longer than older technologies
- ✓ Don't require maintenance
- ✓ Fully compatible with modern solar inverters
- ✓ Daytime charging provides electricity needs until the morning

 **Dyness**  
ENERGY STORAGE SYSTEM

 **PYLONTECH**

 **SUNGROW**  
Clean power for all

## Step 4 Electric Vehicle Charging

- ✓ Minimum Solar Energy System of 10kw required
- ✓ Fully compatible with your Solar Energy System
- ✓ 7.4kw Single-Phase or 22kw Three-Phase
- ✓ Simply park under your solar garage and connect the charger
- ✓ Don't forget! Solar DC chargers are much faster than AC chargers (eg Household Electricity), saving you time & money

**LUXOR**  
solar module manufacturer since 2007

The world is transitioning to  
**Renewable Energy Resources**  
& **Electric Vehicles.**

You too can switch to **green**  
**energy** within 30 days.

Let's Get Started Now!

**No More** ~~Electricity Bills!~~

**No More** ~~Power Outages!~~

**SUNGROW**  
Clean power for all
